Subject: western modeling workshop - draft issue paper on ozone and regional haze modeling
WesternModelingWorkshopSept6-8_2017_agenda_July27th_update_v3_withspeakers_and_topics.pdf
West Reg Air Workshop draft issue paper 4.docx

Hi All,

For the Western Air Quality Modeling workshop in Boulder on Sept 6-8, we plan to share draft “issue papers” at the workshop. Our goal is to summarize background information and key research needs for several topics relevant to western air quality research. As an expert in the field, we want to invite you to review and edit the draft on ozone and regional haze modeling before the workshop. If you send me any comments or edits by August 21, I’ll include your edits in the draft we release at the workshop. These documents will remain drafts, and we will continue to revise during and after the workshop.

I also attached the draft agenda for the workshop. For those who cannot attend the workshop in person, there is also a webinar option available, and you can register at: https://www.wrapair2.org/calendar/viewitem.jsp?&cal_item_id=13132

Thanks,
Gail
